It seems that small business support is growing as evidenced by the Shop Small Saturday campaign from this last weekend. And over time, small businesses grow the economy at a much more sustainable and reasonable pace when compared to big box stores, especially for a Town like Eagle with a population of 6,500 people.

These facts should be seriously considered when evaluating whether or not ERS is right for Eagle. I hope the town council is reading, listening and paying attention to what is truly in Eagle's best interest. Big Box stores are not the answer to any communities financial needs. We, the people of Eagle, are depending on our elected officials to think outside the box and not jump on an out-of-state developers band wagon as a quick fix.
