Subject: Way too much commercial square footage

Mr. Boni,

The current commercial space in Eagle is just over 1M square feet. The second Eagle River Station proposal for 732,000 additional square feet is too much for our community now and over the next 20 years; if built it increases the town's commercial square footage by around 70% of the current commercial space in Eagle. This is simply too much for our "small town" community and goes against many of the references in updated the Eagle Area Community Plan especially those reference elements of a small town starting on page 84.

Thank you for accepting my comments. Please share them with my "representatives" on the council.

Sincerely,
Jaime Walker
