

PROPOSED NOGAL PARK IMPROVEMENTS

OVERVIEW OF NOGAL PARK IMPROVEMENTS

1. Install 90' x 115' turf area that can serve as:
 - One (1) U8 Soccer Field; or,
 - Two (2) side by side U6 Soccer Fields
2. Install Split Rail fence with wire mesh along bike path to catch stray balls and/or trash
3. Construct 2' - 6' tall berm in southwest corner of park
4. Install 16' x 20' Picnic Shelter on concrete slab
 - Existing 12' x 12' Picnic Shelter should be expanded to provide space for larger groups.
 - Relocate existing picnic tables in the town park to larger picnic shelter. Replace existing picnic tables that are in disrepair and consider purchasing additional picnic tables if larger picnic shelter has space to accommodate additional picnic tables.
 - Relocate existing BBQ grill and install second BBQ grill near larger picnic shelter.
5. Install 50' x 47' Basketball Court
 - Relocate existing basketball court to existing parking area.
 - Regrade existing parking area to provide a flat playing surface for relocated basketball court.
 - Relocate existing tree, which is located in the area for the proposed soccer field, near new basketball court to provide shade.
6. Reduce parking from 9-10 spaces to ~5 on-street parking spaces
 - Current parking area is used primarily for Eagle Villas resident parking. Reducing the number of parking spaces and locating park parking further from the Eagle Villas will help to ensure that parking is used for park purposes and not for resident parking.
7. Remove existing playground equipment and re-seed playground area
 - Removal of playground equipment and re-seeding of larger playground area creates space for a possible, future dog park.
8. Add landscaping to screen transformer box
9. Install park sign and landscaping around park sign
10. Thin vegetation to provide views of Eagle River
11.  - Install shade tree
12.  - Install bench
13.  - Install dog waste station (bag dispenser and trash can)
